

FinforeNet

Getting Started

System requirements

LOAD TICKERS

Reference Guide

Before load tickers data for your price column, you should ensure that you have created price column or feed account with user feeds first. The user feeds from price column contain information feed_info_id that you need to load all tickers.

HOST : api.finfore.net / test.finfore.net

METHOD : GET

FORMAT : xml, json, fxml

PATH : /price_tickers.format

PARAMETERS :

- **feed_info_id** :
 - **summary** : it is a reference value from our treasury data which is included in user_feed information
 - value** : integer

Getting help
